

# SPYNEL® IRST Sea-Proven Solution

# 360° DEFENSIVE BUBBLE WITH SPYNEL® IRST

The **SPYNEL® IRST solution** allows **early target discrimination** over extremely wide areas, day & night whatever the weather conditions. **An unlimited number of targets** are simultaneously detected, tracked and identified thanks to high definition thermal images. No exception is made for hardly detectable threats.

#### **KEY FEATURES**

- Fully passive 360° Detection & Tracking
- Self-protection against air/surface asymmetric threats
- Quick reaction time
- Enhanced situational awareness

- No blind sector
- Automatic target identification and classification
- Integration in your Combat Management System
- Highly stabilized system

## DETECT, TRACK, CLASSIFY ANY AIR & SURFACE ASYMMETRIC THREATS

SPYNEL<sup>®</sup> IRST Sea-Proven Solution

### **ENHANCED SITUATIONAL AWARENESS**

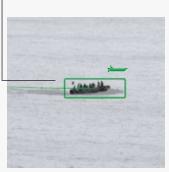

#### SYSTEM DESCRIPTION

**SPYNEL**<sup>®</sup> is a unique IR **embedded system** for 24/7 selfprotection of ships. Capturing videos with an unequalled resolution of up to **120 Mpix**, SPYNEL-X provides powerful situation awareness over 360°. Associated with **CYCLOPE** advanced detection software, it provides unprecedented early warning against conventional and asymmetrical air/ surface threats up to the horizon.

**RHIB** detection and tracking

#### **FULLY INTEGRATED IRST SOLUTION**

- **1. SPYNEL-X** sensors can be fixed on either side of the mast, or on the bow and stern of the vessel, creating **a 360° protective bubble without blind sector** around your ship.
- 2. Data is processed by CYCLOPE Hypervisor software collecting, displaying and fusing on a single workstation, all the threats automatically detected and tracked by the two SPYNEL<sup>®</sup> sensors.

**3.**The processed data is transferred to your **Combat Management System** for quick decision making.
